

Episode 2 of zoo's new "One Wild World" live virtual series premieres this week

Tune in live October 8 at 12:00 p.m.

WHAT: Mark your calendar! **Episode 2: One Northwest: Species and Spaces in the Pacific Northwest** streams live this week. This free event is part of Woodland Park Zoo's new series One Wild World: Examining the Intersection of Animals, Humans and Habitats in a Global Pandemic.

Just as millions of people call the Pacific Northwest home, so do countless species that are vital to its ecosystems and the clean air and water we all depend on. Hear from top conservationists and national leaders about the threats this beautiful region is facing and how we can overcome them, thrive and coexist with wildlife.

See below for a full list of speakers!
