Played like the game battleship, but this time you are a bee looking for specific pollinator-friendly flowers.

1. First, plant flowers in your garden's grid using the following codes:

   - Silver lupine (SS)
   - Larkspur (LLL)
   - Trillium (TTTT)
   - Rose (RRRRR
   - Columbine (CCCCCC)

2. Take turns guessing the location of your opponent's flowers by calling out the number and letter of a square.
3. Mark any "hits" or "misses" in your opponent's garden using the lower garden grid.
4. Find all their flowers first and you become the pollinator queen (or king) bee!

WOODLAND PARK ZOO

BEE-UTIFUL!

@WoodlandParkZoo

Can you find all these buzz-worthy words?
Look carefully to reveal a garden of pollinator-friendly bee vocabulary!

Pollinators include bees, butterflies, hummingbirds, bats, flies, moths and more! In the United States, there are over 4,000 species of native bees and in Washington state there are 600 species... that's a lot to buzz about! Can you find all the perfectly pollinated words below?

Bonus! See if you can spot one of each bee species this summer: **carpenter bee, leafcutter bee, bumble bee, mason bee, sweat bee** and **honeybee.**

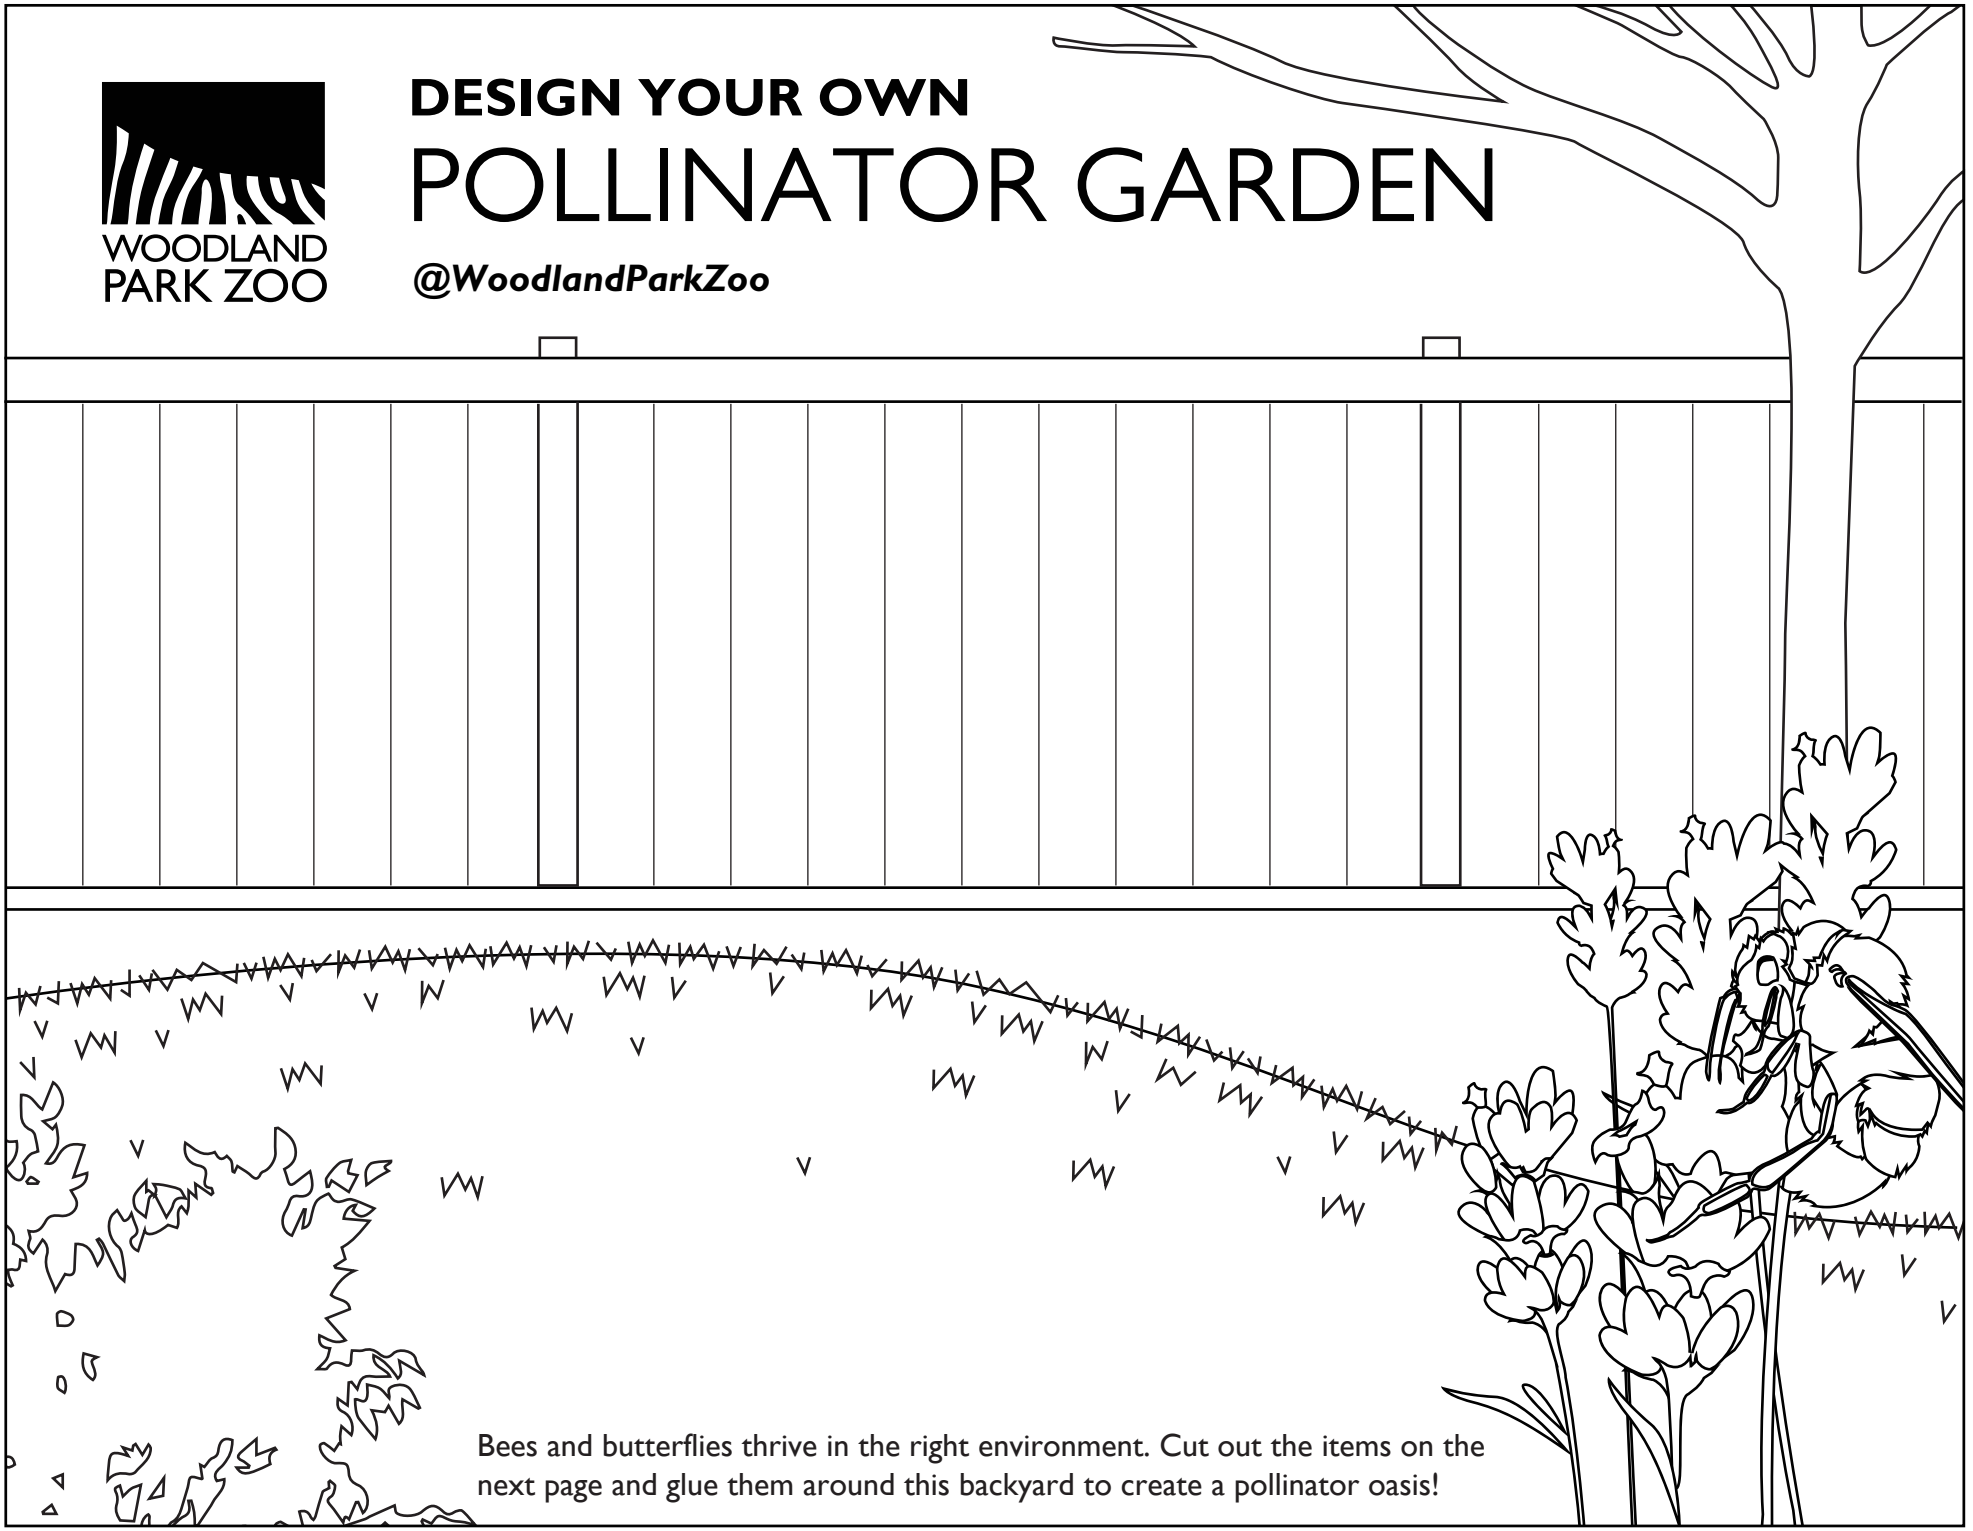
WOODLAND PARK ZOO

DESIGN YOUR OWN
POLLINATOR GARDEN

@WoodlandParkZoo



Bees and butterflies thrive in the right environment. Cut out the items on the next page and glue them around this backyard to create a pollinator oasis!

WOODLAND PARK ZOO

Use these items to get started, then add your own ideas!

- Hummingbirds like to sip nectar from gooseberry bushes.
- Honey bees enjoy iris flowers
- Mason bees love a protected tunnel shaped nest
- Carpenter bees like to nest in cottonwood or willow tree logs, leave some on the ground
- Butterflies would love a Pacific dogwood tree (water well!)
- Bats need a bat box at least 12 feet off the ground with 6-8 hours of direct sun
