

WHAT DO POLLINATORS NEED?

All living things need food, water and shelter.

Can you find places in the Microsoft Pollinator Patio where pollinators find:

- Food
- Water
- Shelter

OBSERVING POLLINATOR BEHAVIOR

Look for pollinators...

- Sipping water from the ground
- Chasing each other in the air
- Gathering nectar from flowers
- Basking with wings open in the sun

How do you think these behaviors help pollinators survive?

LOOK CLOSELY AT A POLLINATOR...

Draw a pollinator that you see. Add notes about details (such as what color it is).

POLLINATOR SCAVENGER HUNT

Mark the pollinators you see at the zoo:

- Bee 
- Beetle 
- Hummingbird 
- Butterfly 
- Moth 

You may not see all of them. Keep an eye out around your home and school.

WE NEED INSECTS!

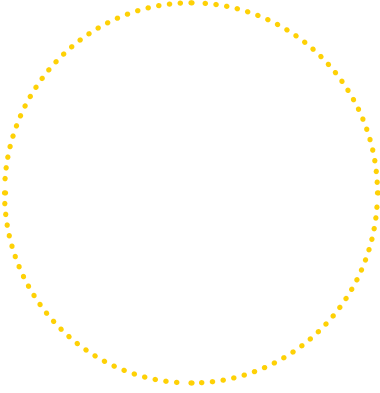

What are some foods that you enjoy that need pollinators? See exhibit signs for clues...

MY POLLINATOR PLEDGE:

 I will help pollinators where I live by...
