

WILD WISE: COEXISTING WITH CARNIVORES CAMERA TRAP DATA SHEET

Please fill in all sections when you set up a camera or collect photos from a camera

CAMERA SETUP CHECKLIST

- Secure camera tightly on tree or other structure between knee and waist height
- Input camera settings, check that the Date/Time are correct, record this on the data sheet
- Check that batteries are sufficient (at least 50%) by looking at battery symbol on set-up screen
- Clear vegetation or other obstructions from camera view
- Make sure the camera is pointing parallel with the ground – use sticks to change the angle if necessary
- Measure the distance from the camera to the “target” (a trail, a trash can, or other central point) – record this on the data sheet
- Arm the camera (move from SETUP to ON), close and lock it securely
