## Urban Float - 3 Float Package Gift Certificate

Treat yourself to this 3-pack Float at Urban Float. Float therapy is a revolutionary break through in alternative healing and a great way to explore creative thinking. During a float you are suspended effortlessly in a super saturated solution of epsom salt and water within a light and sound controlled environment that reduces sensory stimulation and effectively suspends the effects of gravity on the central nervous system. The water is at skin temperature and after a few minutes you lose the awareness of where the body ends and the water begins. Resting in this unique environment creates profound changes within the mind/body system and actually improves the overall function of the brain and central nervous system. After your first float you may think it seems like magic but it's actually backed by over 30 years of mainstream scientific research in human performance.
